Stewardship.
It's more than a program.
It's our business.

Responsible stewardship is not only the right choice for Bayer CropScience; it's what our customers, regulatory agencies, and other stakeholders expect from us.

Stewardship is a part of Bayer CropScience's Commitment to Sustainable Agriculture.

Your Partner for Growth

Stewardship. It's more than a program. It's our way of business.

At Bayer CropScience we do more than just comply with the rules and regulations. Our products are used in fields, orchards, vineyards, recreational areas, and homes to guard against the ravages of insects, diseases and weeds. We work together with our partners in the industry and in our communities to address issues.

We practice stewardship by:

- Developing training and education for our employees and yours;
- Improving worker safety;
- Preventing misuse by educating workers, customers and the communities where they're used;
- Participating in container recycling;
- Reviewing application practices to minimize environmental impacts;

- Working with our customers to ensure that our products are sold and stored properly;
- Providing emergency response teams;
- Conducting research to protect human health and the environment; and
- Providing our Stewardship Team's expertise in the field daily to ensure the protection of people, our natural resources and our environment.

Every day we work together with our partners to create a win-win situation for all the stakeholders.

Responsible stewardship is not only the right choice for Bayer CropScience; it's what our customers, regulatory agencies, and other stakeholders expect from us.

A SHOWCASE OF SUCCESSES

Application Practices Protect Our Product, Our Environment, Our People

"TEMIK® and our stewardship program are unparalleled by any other agricultural product in Florida."

Sustaining Our Portfolio of Products by Preventing Misuse

"We are committed to proper marketing, selling, and application of our products in addition to adhering to Federal and State Labels."

Protecting Water Quality and Growing Corn Profitably

"Bayer CropScience . . . encourage the use of integrated, sustainable Best Management Practices to protect both sensitive species and our water resources."

Partners in Research

"By working together . . . we can limit or prevent soils from entering surface waters and therefore protecting our natural resources, our environment and our grower's livelihood."

To request a success story, contact your state affairs manager

At Bayer CropScience, we take stewardship seriously by integrating it into every aspect of our daily business by managing our products responsibly and ethically from invention to use and beyond.

Our Stewardship Team provides expertise in the field daily to ensure the protection of people, our natural resources and our environment.
