

# Winter Cereals

*Sustainability in Action*

**IPSWICH, SD**

**Winter Wheat Variety Trial**

## 2008 Performance Results

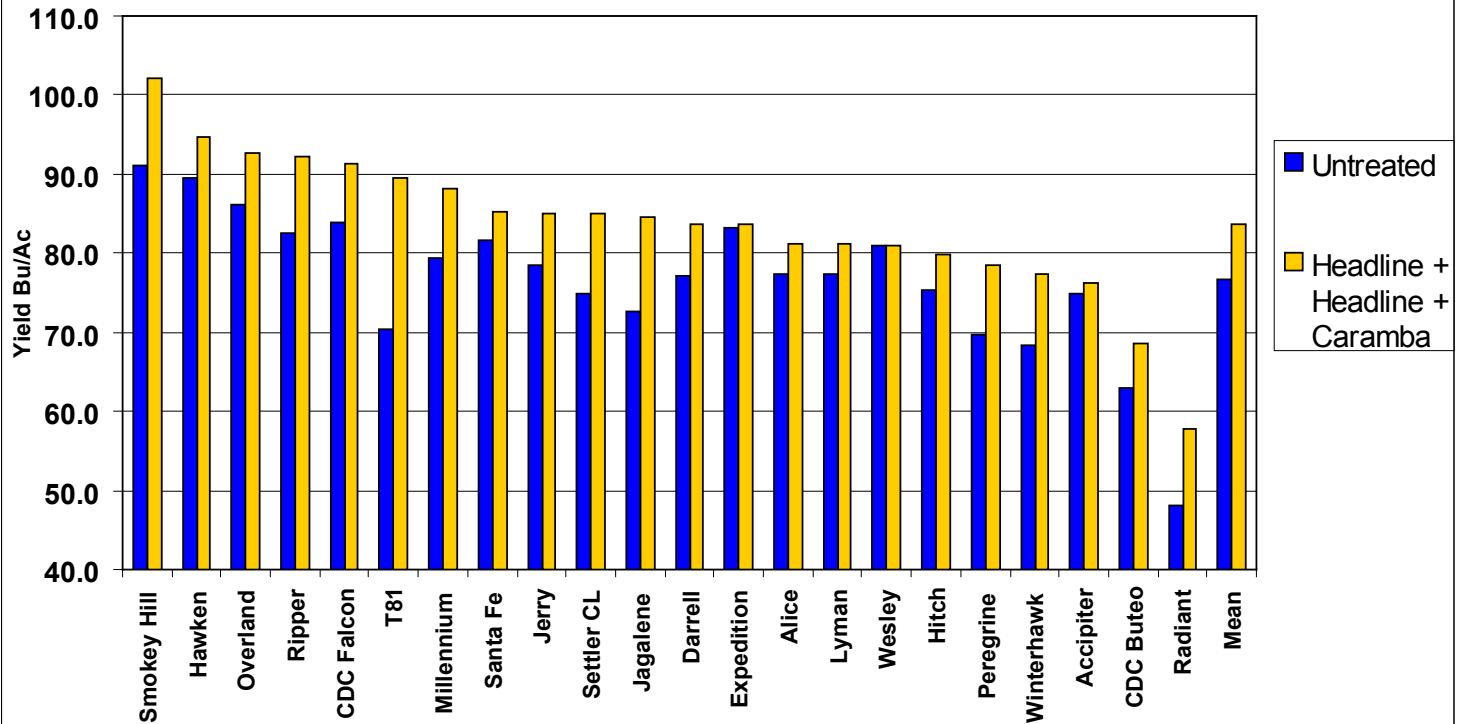

Variety	Untreated	Headline + Headline + Caramba	% Protein
Smokey Hill	91.2	102.1	13.8
Hawken	89.5	94.6	13.2
Overland	86.1	92.7	13.5
Ripper	82.5	92.2	13.6
CDC Falcon	84.0	91.3	14.1
T81	70.3	89.6	13.0
Millennium	79.5	88.1	13.9
Santa Fe	81.6	85.2	13.0
Jerry	78.5	85.0	13.4
Settler CL	75.0	85.0	13.6
Jagalene	72.7	84.5	13.5
Darrell	77.1	83.7	13.6
Expedition	83.2	83.7	13.1
Alice	77.3	81.2	13.1
Lyman	77.4	81.1	13.3
Wesley	80.9	81.0	13.3
Hitch	75.4	79.9	14.0
Peregrine	69.7	78.4	14.1
Winterhawk	68.4	77.3	12.9
Accipiter	74.8	76.3	12.9
CDC Buteo	63.0	68.5	13.4
Radiant	48.1	57.7	13.2
Mean	76.6	83.6	13.4
LSD 5%		12.2	
CV%		9.4	

LSD (Least Significant Difference) = the number of units (either bu/A or protein percentage points or test weight) difference required in order to be considered statistically different. The LSD applies to both varietal differences within a fungicide treatment (with or without) as well as to the effect of fungicide within a variety.
