Sustainability in Action

TAGUS, ND

Winter Wheat Variety Trial

2009 Performance Results

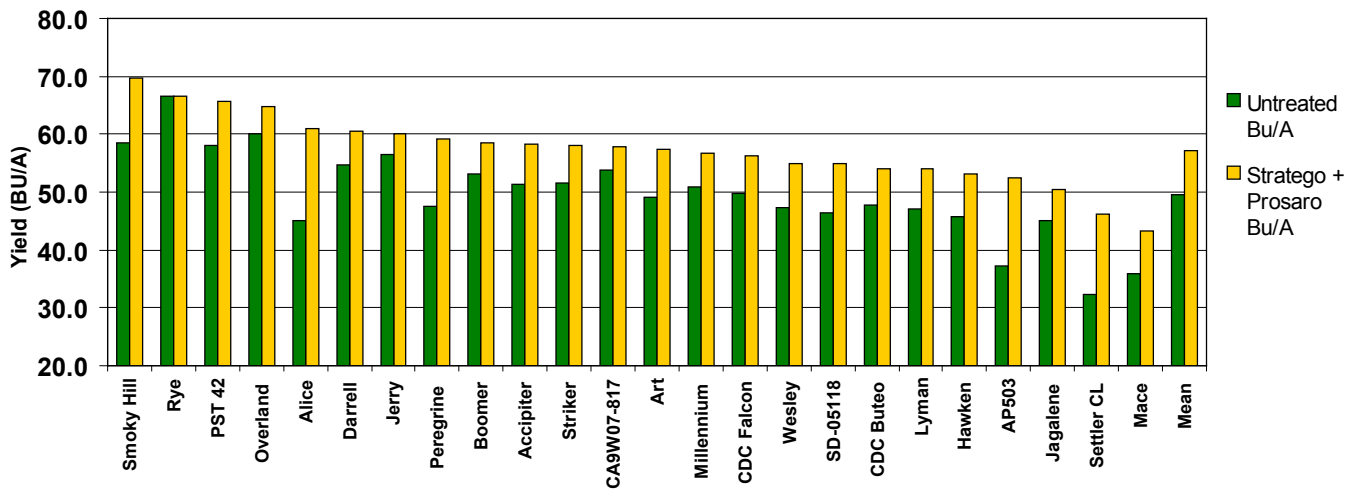

Variety	Untreated Bu/A	Stratego + Prosaro Bu/A	Combined Winter Survival (% Stand)	Combined % Protein	Combined Test Wt (lb/bu)
Smoky Hill	58.4	69.7	88.8	10.4	64.7
Rye	66.5	66.6	96.5	8.1	54.5
PST 42	58.1	65.7	86.9	10.2	59.5
Overland	60.1	64.8	90.6	10.5	64.1
Alice	45.1	61.0	91.2	10.2	63.4
Darrell	54.7	60.6	89.9	10.4	62.8
Jerry	56.4	60.0	94.8	10.6	62.8
Peregrine	47.5	59.2	93.5	9.3	63.3
Boomer	53.1	58.5	92.4	10.1	63.0
Accipiter	51.4	58.2	94.8	9.6	63.1
Striker	51.5	58.0	91.3	10.3	64.0
CA9W07-817	53.8	57.9	92.9	10.9	63.7
Art	49.1	57.4	84.4	10.6	64.0
Millennium	51.0	56.8	91.8	10.4	64.0
CDC Falcon	49.8	56.2	94.8	9.7	63.7
Wesley	47.4	55.0	89.9	11.0	64.5
SD-05118	46.5	54.9	90.1	9.8	64.0
CDC Buteo	47.8	54.0	93.5	10.2	64.0
Lyman	47.1	54.0	91.7	10.7	64.8
Hawken	45.7	53.2	85.5	10.6	63.9
AP503	37.3	52.5	84.4	10.2	64.0
Jagalene	45.1	50.5	85.0	11.1	63.9
Settler CL	32.3	46.2	82.6	10.0	63.3
Mace	35.9	43.2	83.2	9.7	62.4
Mean	49.7	57.3	90.0	10.2	63.1
LSD 5%	8.0	8.0	5.30	0.50	1.00
CV%	10.7	10.7	4.20	3.70	1.20

LSD (Least Significant Difference) = the number of units (either bu/A or protein percentage points or test weight) difference required in order to be considered statistically different. The LSD applies to both varietal differences within a fungicide treatment (with or without) as well as to the effect of fungicide within a variety.

The shared
vision
 of

Ducks Unlimited and Bayer CropScience
 for the future of agriculture includes a stewardship
 model that recognizes the agricultural productivity of
 farmland while retaining and improving the habitat
 available to North America's waterfowl and other wildlife.
