

Adrian Percy, Ph.D
Vice President,
Development and Market Support
Bayer CropScience LP

Adrian Percy is Vice President, Development and Market Support at Bayer CropScience. His team has responsibility for the development of crop protection products for the US market as well as providing technical support for our marketing and sales organization, customers and co-operators. He began his career in 1991 as a Toxicologist with Rhone-Poulenc in France. Since then, he has held numerous positions in the Research and Development departments of Bayer CropScience and its legacy companies in France, Germany and the USA.

Adrian grew up and studied in the United Kingdom earning a Bachelor's degree in Pharmacology at the University of Liverpool, a Master's degree in Toxicology and then a doctorate in Biochemistry at the University of Birmingham.

Adrian is married, has two children and currently resides in Raleigh, NC.
